

BULLY DOG

#1 IN PERFORMANCE

gauge **GT** tuner

GAS

The Triple Dog Gauge Tuner is an vehicle engine tuner, monitor, gauge and diagnostic device all in a single unit. The GT dramatically improves the utility of several different vehicle applications by providing an increase in horsepower and torque and by improving fuel economy. The GT monitors and displays over twenty different vehicle parameters which allows the end user to view important vehicle information not provided by the OEM. The GT also performs vehicle diagnostics by reading and erasing diagnostic trouble codes, that sort of transparency is very valuable and many products available at auto parts stores provide only that feature. The GT does it all and it works on the largest range of gasoline powered vehicles; in fact the GT works on over eight different vehicle makes and over 50 different models.

New the GT and the Bully Dog product feature line up is the all new patent pending Driving Coach feature. According to outside research studies, drivers can save up to 37% on their monthly fuel bill simply by adopting better driving habits. The Driving Coach feature shows people specifically where their current losses are coming from so they can make adjustments to correct their inefficiencies. It provides audio and visual feedback to instruct a driver into better driving habits, read more about the driving coach feature below.

FEATURES:

- Added horsepower and torque
- Improved fuel economy
- Three different power levels
- Easy installation (20-40 minutes)
- Free internet updates and upgrades
- Monitor and display vehicle parameters (PIDs)
- Full Color display with multiple color themes
- User set daytime and nighttime driving modes
- Display current gear on vehicles with auto trans
- Vehicle specific download features
- Read and Erase Diagnostic Trouble Codes
- Display instant fuel economy and trip fuel economy
- Exclusive Driving Coach feature, Patent Pending

DESCRIPTION	PART #	MSRP	PACKAGING WEIGHTS	PACKAGING DIMENSIONS	UPC CODE
TRIPLE DOG GT GAS	40410	\$469.99	2 lbs	12.5" x 12.5" x 4"	681018404105
TRIPLE DOG GT PYROMETER KIT	40390	\$159.99	1 lb	7" x 5" x 2"	681018403900
Pyrometer Probe	40391	\$53.99	1 lb	7" x 5" x 2"	681018403917

PRODUCT INFORMATION SHEET

THE DRIVING COACH, A FUN WAY TO SAVE FUEL:

The Driving Coach is a special new feature designed to help drivers drive more efficiently. It coaches drivers into better driving habits by providing real time visual and audio feedback as to how efficient a driver is driving and it actually gives the driver a grade. The driving coach is fully customizable allowing users to set fuel economy goals which will directly effect their grade. The driving coach can make driving efficient constructive and fun. Drivers can use the Driving Coach to coach themselves into improved driving habits. Every driver can challenge themselves to be: "The perfect driver."

THE DRIVING COACH DISPLAY DIAGRAM

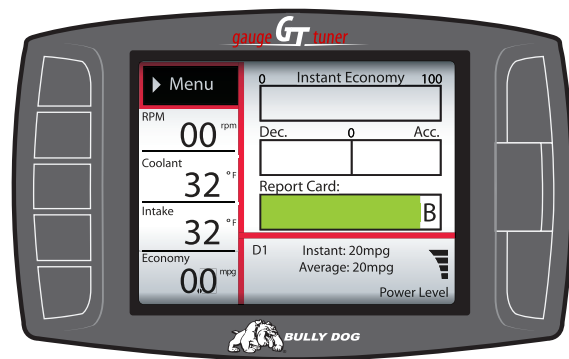

The large gauge area is where the Driving Coach information is displayed. The diagram below illustrates the information that is collected and displayed by the Driving Coach.

Real Time Fuel Economy: The first bar graph displays instant fuel economy in miles per gallons.

Wasted Energy: The waste energy graph, middle graph, displays acceleration and deceleration. The center line of this graph represents zero wasted energy. If a driver accerates too quickly or decelerates too quickly they will see a bar extend outword from zero indicating energy wasted.

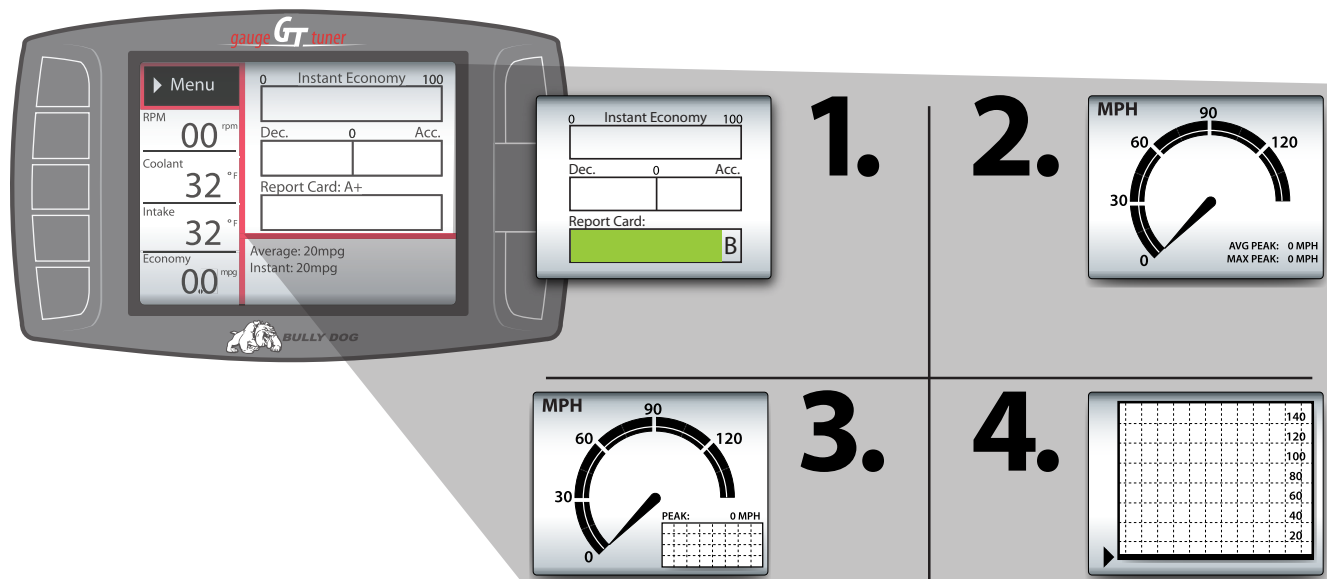

Grade: The driving Coach offers the user a grade to show them how well or how efficiently they are driving. This grade is directly effected by how well the driver meets their instant economy goal and by how closely they can keep acceration and deceleration to zero. The Driving Coach will display one of six possible grades, grades are based on an average overall driving efficiency rating:

A	A You are an efficient Driver
B	B Good
C	C Average
D	D Poor
F	F Fail
EPIC FAIL	Epic Fail You car is probably broken

MULTIPLE GAUGE DISPLAY STYLES :

The GT has four different gauge styles including the driving coach feature, any vehicle parameter can be displayed as a large stylized gauge on the GT screen.

PRODUCT INFORMATION SHEET

DOWNLOAD FUNCTIONS, DEFUELING, AND MONITORING CHART:

The chart below shows which features are avialable for all of the applications by vehicle make.

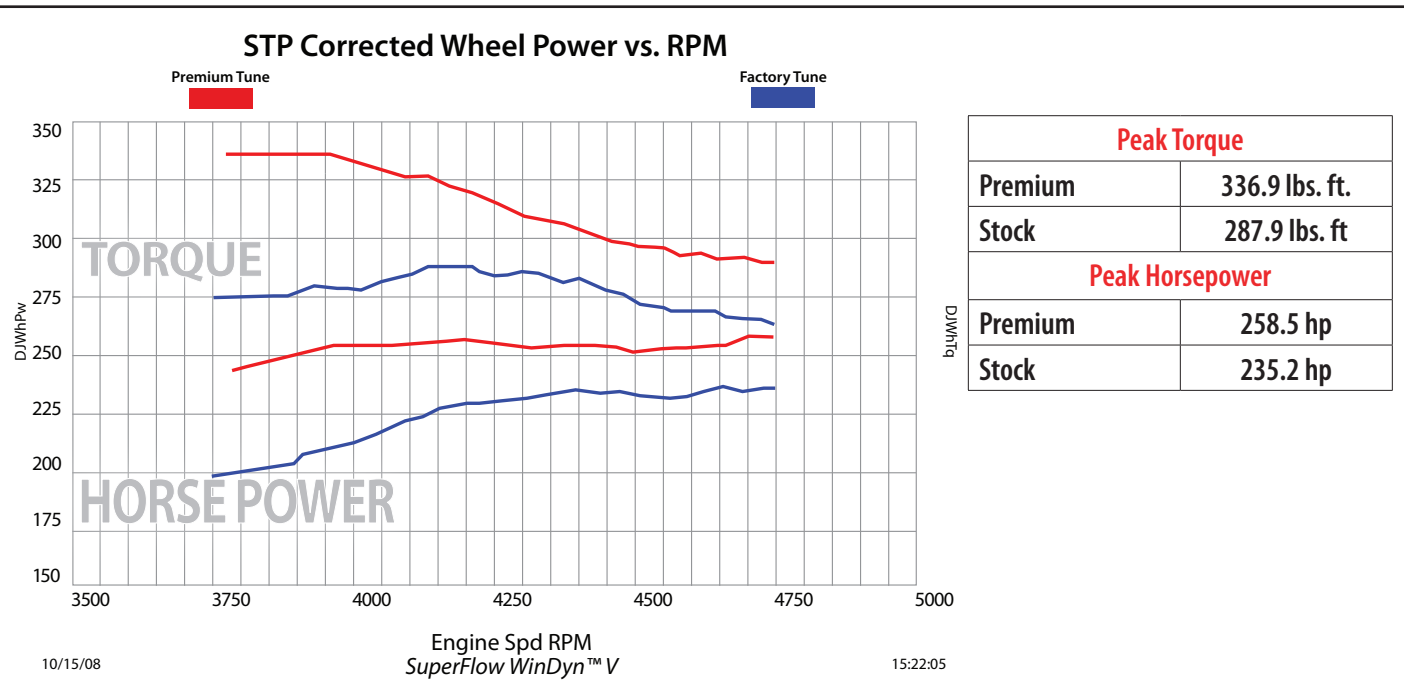

- **Engine Tuning Capabilities:** see the tunes available for gasoline vehicles and see the fuel requirements for each tune.
- **Download Functions:** Download functions include vehicle governors and settings that can be changed only during a download.
- **Monitoring Capabilities:** A list of vehicle parameters and PIDs that the GT gas monitors and displays.

Gauge Tuner functions, defueling and monitoring features Chart	Dodge/Chrysler	Ford/Lincoln	GM	Nissan/Infiniti
Engine Tuning				
Stock tune, use other features with stock power	X	X	X	X
Regular tune 10-15 added hp, 85 octane fuel	X	X	X	X
Premium tune, up to 35 hp, at least 91 octane fuel	X	X	X	X

PRODUCT INFORMATION SHEET

GT POWER:

The dyno chart below represents a stock test run performed on a chasis dynamometer vs. test runs performed using the premium setting available on the GT. This test was performed on a 2007 Nissan 5.6L Titan pickup.

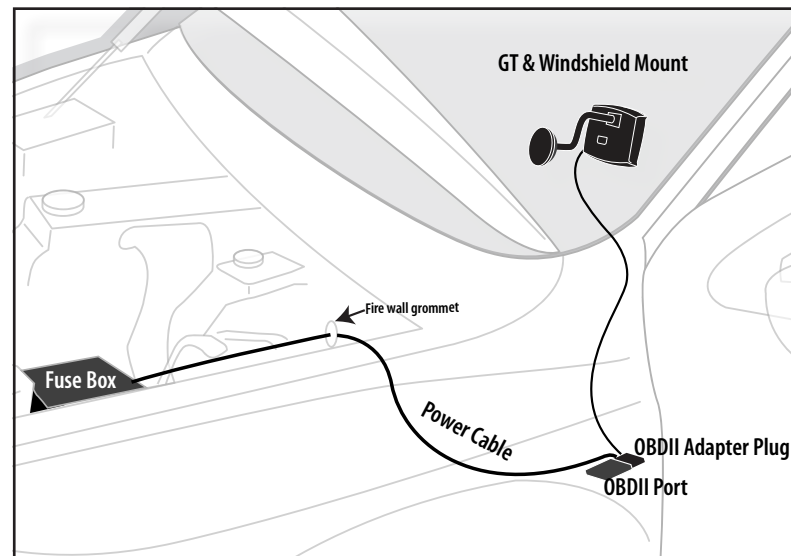

GT INSTALLATION:

The GT is one of our easiest products to install, this diagram illustrates just how few parts we require for installation.

GT MOUNTING OPTIONS:

The GT comes with a custom windshield mount. In addition the GT mounting socket on the back of the unit is a universal T-socket style mount. This T-socket will accommodate almost any off the shelf mounting style. Various mounting styles can be found at any major electronics retailer.

EXTRA

The GT has the capability of monitoring both pre & post pyrometer temperatures with the addition of the GT Pyrometer kit.
