

SilverBullet THROTTLE BODY SPACERS

Quiet, Efficient, Responsive Power.

**Gain up to:
10 HP & 14 lbs/ft TQ**

- Precision machined from solid T-6061 billet aluminum to exacting specification for optimal performance.
- Combination serrated/helix design creates turbulence so that air/fuel charge is thoroughly mixed for complete burn.
- The serrated entry reduces annoying whistling sound especially at idle and cruising speeds.
- The additional space increases the volume between throttle and cylinder improving volumetric efficiency.
- Available only for applications that show dyno-proven results.
- Fifty state legal (CARB EO# D-516-2)

Dyno Proven!

Applications

- DODGE
- FORD
- GM
- JEEP
- NISSAN
- TOYOTA

Max Gain:
6 HP & 10 lbs/ft TQ
After SilverBullet installed
Before SilverBullet installed

* as tested on 2005 Toyota Tacoma
w/ aFe Stage 2 intake and aftermarket exhaust

Tech Sheet

SilverBullet Throttle Body Spacer

Features & Benefits

Additional space after throttle and serrated helix created turbulence improves volumetric efficiency.

T-6061 billet aluminum for long lasting performance

Serrated entry reduces annoying whistle at idle and cruising speeds.

Silver Bullet Application

CHRYSLER

Silver Bullet Application	aFe Air Intake System PN	HP	TQ	aFe PN	Jobber
Chrysler 300C 05-07 V8-5.7L HEMI, V8-6.1L SRT8	51/54-10711; 51/54-10712	9	10	46-32002	\$107.00
