- Rear truss is removable to allow loading of large items from the rear into cargo bed area
- PVC insert on rear crossmember for smooth, low-friction loading and unloading of cargo
- Components remove and install quickly and easily
- UPS shippable!

Pace Edwards introduces the *NEW!* Contractor Rig[®] and Utility Rig[®] rack systems for the *NEW!* Explorer Series[™] rails and BedLocker[®] and JackRabbit[™] retractable hard tonneau covers. Now you can have the material transport capabilities of a commercial truck and the cargo protection of a tonneau cover!

Rigid, freestanding aluminum trusses provide exceptional stability and rear cross member is removable for loading large items. Utility Rig[®] system holds 600 lbs. and Contractor Rig[®] system adds extension beams and winches to hold 1250 lbs. of equipment, tools and supplies. Quickly and easily installed and removed, components are UPS shippable.
