

# CONTRACTOR RIG®

**NEW!**

Contractor rack system that fits in our ExplorerSeries™ Rails

Four Work Winches™ and handles are included.

- Versatile and economic rack system works with our Explorer Series Rails and JackRabbit™ and Bedlocker® retractable tonneau covers
- Designed for professional contractors
- Rust-free aluminum trusses provide exceptional front-to-rear stability
- Stainless steel fasteners used on all components and accessories for long-wearing durability
- Extension beams provide rigid support for longer loads
- Rear crossmember is removable to allow loading of large items from the rear into cargo bed area
- PVC insert on rear crossmember for smooth, low-friction loading and unloading of cargo
- 1250-lb. capacity safely hauls heavy ladders, material and tools
- UPS shippable!

Check out the versatile and economic new Contractor Rig<sup>®</sup> System from Pace Edwards. Strong, rustproof aluminum trusses support up to 1250 lbs, while aluminum extension beams provide rigid support for longer loads. The removable rear cross member (with adjustable handles) allows large items to be loaded easily, and has a PVC low-friction insert for smooth, friction-free loading and unloading of overhead cargo. Also included are four Work Winches<sup>™</sup> with handles. Contractor Rig<sup>®</sup> is a popular package for professional contractors, and perfect for use with any Pace Edwards retractable tonneau cover. Fast installation requires NO drilling, and the whole system is UPS shippable.
