

## Trouble Shooting Guide

Problem	Cause	Fix
Cover doesn't close all of the way to the tailgate.	Rails are installed improperly	Remount rails towards the tailgate.
Cover will only roll back 1/3 to 1/2 of the way back, then stops.	Something could be lodged in the rails.  Possible Broken Spring	Remove any foreign objects from the covers path in the rails and inside the canister box.  Check the spring tension by manually rolling the cover, if you suspect that the spring is broken, contact Pace Edwards or your local dealer.
Cover appears to be grey or white in color (fading)	Using waxes or other cleaners on the cover will create a build up along with particles of dust causing your cover to appear as though it is fading.	Pace Edwards covers do not fade. We recommend using a mild soap and water solution along with a soft bristled brush to scrub away any impurities. Once removed we recommend using a protectant such as Pace Edwards Brand UV protectant.
Cover is hard to roll back	Inner rails may be in too close	Unscrew the screws on the underside of the rails and adjust the inner rail outwards (toward the truck bed rails)
