

## DODGE EZ ('98.5-'02) FAQ'S

### **Q: WILL INSTALLING THE DODGE EZ VOID MY FACTORY WARRANTY?**

**A:** While the answer is straightforward from a legal standpoint, we also want to educate our customers (and after-market consumers) on some industry realities and offer some common sense precautions to minimize your risk.

Consumers of aftermarket products are protected by The Federal Magnusson-Moss Warranty Act. The Act states that if something breaks on your car and you take it in for warranty repair, the dealer must honor your warranty unless they can prove that whatever modifications you have added to your car actually caused the problem.

While as a consumer you have strong legal protection regarding your vehicle's warranty, there is also a practical reality that different automotive manufacturers and dealers have greatly varying views on aftermarket products, in particular those that produce horsepower, such as performance enhancement chips, modified intake manifolds, or aftermarket exhaust systems. There are dealers and manufacturers out there that will use the presence of a horsepower upgrade to void your vehicle's warranty. They will do this regardless of whose product you are using. Any aftermarket company that does not acknowledge this is misleading you.

The bottom line is that while the law protects the consumer and provides for enforcement of the warranty, it is very difficult for most people to hire an attorney and fight a voided warranty. Edge recommends that you **always disconnect and/or remove any performance device or programmer before you take your vehicle to a dealer for any service**, in order not to interfere with Diagnostic equipment.

### **Q: WILL THE EZ CAUSE ANY DAMAGE TO THE TRANSMISSION?**

**A:** No, however hard driving styles or abuse can cause damage to transmission even at stock power levels, and the increase in power could accelerate this.

### **Q: DOES THE EZ WORK THE SAME ON THE H.O. MOTORS AND A NON-H.O. MOTOR?**

**A:** You will see a slight increase in performance with an H.O. compared to a non-H.O.

**Q: WILL THE EZ INCREASE EGT'S?**

**A:** With normal driving you won't see an increase. While towing you will notice a slight increase in the temperatures. Please use gauges with any aftermarket performance upgrade.

**Q: WILL THE EZ FIT ALL YEARS FROM '98.5-'02?**

**A:** No. There are separate modules for '98.5-'00, '01, and '02. There is an adapter for the '02 allowing a '01 to fit, but not for the other years. Be year specific when ordering for your truck.

**Q: WILL THE EZ IMPROVE FUEL ECONOMY?**

**A:** Yes. Based on driving style you may see about a 10% increase in fuel efficiency. Fuel efficiency can vary according to your driving style.

**Q: HOW DO I GET THE BEST FUEL MILEAGE?**

**A:** Do not change driving habits from normal "good driving mileage" habits. Some find it hard to do with the extra power provided by the EZ.

**Q: WHAT DO THE JUMPER SETTINGS DO ON THE EZ?**

**A:** The settings located under the back faceplate on the module itself control the fueling. If you are running larger injectors the first setting is recommended. With medium injectors the middle setting is recommended. The third setting is for stock trucks with stock injectors. These settings also help control your smoke. EZ Jumper setting 1: 33% of additional fuel is added at 0 psi boost 100% is added at 20 psi boost EZ Jumper setting 2: 50% of additional fuel is added at 0 psi boost 100% is added at 15 psi boost EZ Jumper setting 3: 67% of additional fuel is added at 0 psi boost 100% is added at 10 psi boost

**Q: DO I HAVE TO USE THE BOOST ELBOW?**

**A:** No. However, the boost elbow helps to create more boost, causing lower EGTs. The boost elbow is not applicable on all applications. Examples: '01- '02 Automatic Transmission Cummins. '04.5 (600) Cummins has an electronic waste gate, so it does not apply as well.
