

FORD EZ FAQs

Q: WHAT YEARS DOES THE FORD EZ FIT?

A:

The Ford EZ will fit years 1994-2003 (7.3 liter Power Stroke)

Q: WILL INSTALLING THE EZ VOID MY FACTORY WARRANTY?

A:

While the answer is straightforward from a legal standpoint, we also want to educate our customers (and after-market consumers) on some industry realities and offer some common sense precautions to minimize your risk.

Consumers of aftermarket products are protected by The Federal Magnusson-Moss Warranty Act. The Act states that if something breaks on your car and you take it in for warranty repair, the dealer must honor your warranty unless they can prove that whatever modifications you have added to your car actually caused the problem.

While as a consumer you have strong legal protection regarding your vehicle's warranty, there is also a practical reality that different automotive manufacturers and dealers have greatly varying views on aftermarket products, in particular those that produce horsepower, such as performance enhancement chips, modified intake manifolds, or aftermarket exhaust systems. There are dealers and manufacturers out there that will use the presence of a horsepower upgrade to void your vehicle's warranty. They will do this regardless of whose product you are using. Any aftermarket company that does not acknowledge this is misleading you.

The bottom line is that while the law protects the consumer and provides for enforcement of the warranty, it is very difficult for most people to hire an attorney and fight a voided warranty. Edge recommends that you **always disconnect and/or remove any performance device or programmer before you take your vehicle to a dealer for any service**, in order not to interfere with Diagnostic equipment.

Q: HOW DOES THE FORD EZ AFFECT FUEL MILEAGE?

A:

With the module installed you can expect to see a 10% increase in fuel efficiency based on driving style.

Q: HOW DO I GET THE BEST FUEL MILEAGE?

A:

Do not change driving habits from normal "good driving mileage" habits. Some find it hard to do with the extra power provided by the EZ.

Q: WILL THE FORD EZ DAMAGE MY TRANSMISSION?

A:

No, however hard driving styles or abuse can cause damage to your transmission even at stock power levels, and the increase in power could accelerate this.

Q: WILL THE FORD EZ INCREASE EGT'S?

A:

Normal driving you will not see an increase in EGT's. You can expect to see some increase while under a load.

Q: WILL THE FORD EZ WORK ON AN AUTOMATIC AND A STANDARD TRANSMISSION?

A:

Yes, the Ford EZ is compatible with the automatic or the standard transmission.

Q: WHAT DO THE JUMPER SETTINGS DO ON THE FORD EZ?

A:

The jumpers control responsiveness. The various levels achieve their effect by controlling the increase of oil pressure through the ICP sensor.

Q: WHAT SHOULD BE DONE IF THE TRUCK THROWS A CHECK ENGINE LIGHT AFTER THE MODULE IS INSTALLED?

A:

Adjusting the jumpers to a lower setting will decrease the pressure from the ICP sensor, which is the cause of the check engine light being triggered. Level 2 is the best setting for avoiding a check engine light.
