

FORD JUICE FAQs

Q: WILL INSTALLING THE FORD JUICE VOID MY FACTORY WARRANTY?

A:

While the answer is straightforward from a legal standpoint, we also want to educate our customers (and after-market consumers) on some industry realities and offer some common sense precautions to minimize your risk.

Consumers of aftermarket products are protected by The Federal Magnusson-Moss Warranty Act. The Act states that if something breaks on your car and you take it in for warranty repair, the dealer must honor your warranty unless they can prove that whatever modifications you have added to your car actually caused the problem.

While as a consumer you have strong legal protection regarding your vehicle's warranty, there is also a practical reality that different automotive manufacturers and dealers have greatly varying views on aftermarket products, in particular those that produce horsepower, such as performance enhancement chips, modified intake manifolds, or aftermarket exhaust systems. There are dealers and manufacturers out there that will use the presence of a horsepower upgrade to void your vehicle's warranty. They will do this regardless of whose product you are using. Any aftermarket company that does not acknowledge this is misleading you.

The bottom line is that while the law protects the consumer and provides for enforcement of the warranty, it is very difficult for most people to hire an attorney and fight a voided warranty. Edge recommends that you **always disconnect and/or remove any performance device or programmer before you take your vehicle to a dealer for any service**, in order not to interfere with Diagnostic equipment.

Q: WILL THE JUICE MODULE INCREASE FUEL ECONOMY?

A:

Yes. Based on driving style you may see about a 10% increase in fuel efficiency. (Over stock)

Q: HOW DO I GET THE BEST FUEL MILEAGE?

A:

Do not change driving habits from normal "good driving mileage" habits. Some find it hard to do with the extra power provided by the Juice module.

Q: HOW MANY POWER LEVELS DOES THE JUICE HAVE?

A:

The Juice by itself has three power levels to choose from. These power levels produce rear wheel power gains of 60, 80, and 100 horsepower and 100, 160, and 250 pounds of torque.

Q: HOW CAN I INCREASE THE POWER?

A:

With the addition of the Attitude monitor, you can add 2 additional levels of adjustable power. These power levels produce rear wheel power gains of 40, 60, 80, 100 and 115 horsepower and 80, 100, 160, 250 and 290 foot pounds of torque.

Q: DO I NEED TO DOWNSHIFT TO GET THE ADDITIONAL POWER?

A:

While towing, the extra power from the Juice module allows the engine to pull many grades in the rpm's rather than having to downshift and pull them in the high rpm's. This allows for lower Exhaust Gas Temperature with the same power output.

Q: DOES THE TOW/HAUL WORK THE SAME WITH THE JUICE ON?

A:

Yes the Tow/Haul does work the same with the juice on.
