Chevy/GM Duramax Diesel 6.6L 2004.5-2005 LLY

5 In-Cab Adjustable Power Levels*
Quick & Easy Installation
Added Gains of 30-120 Horsepower.
Adds up to 275 Foot Pounds of Torque
Displays & Clears Trouble Codes*
Excellent Throttle Response & Monitors Shift Points
Helps Eliminate Downshifting While Towing
Increases Fuel Economy
Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times a host of other parameters*
*With the Attitude Optional In Cab Controller

Chevy/GM Duramax Diesel 6.6L 2001 2004 LB7

5 In-Cab Adjustable Power Levels*
Quick & Easy Installation
Added Gains of 60-150 Horsepower
Adds up to 350 Foot Pounds of Torque
Displays & Clears Trouble Codes*
Excellent Throttle Response & Monitors Shift Points
Helps Eliminate Downshifting While Towing
Increases Fuel Economy
Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times a host of other parameters*
*With the Attitude Optional In Cab Controller

Ford 6.0L Power Stroke Diesel 2003-2006 (Juice Platinum)

5 In-Cab Adjustable Power Levels
Easy 30-Minute Installation
Added Gains of up to 115 Horsepower
Adds 170 Foot Pounds of Torque
Transmission Control & Turbo Timer
Displays & Clears Trouble Codes
Excellent Throttle Response & Helps Eliminate Downshifting While Towing
Increases Fuel Economy
Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times a host of other parameters. Juice Platinum included Attitude controller

Ford 6.0L Power Stroke Diesel 2003-2006 (Juice)

5 In-Cab Adjustable Power Levels*
Quick & Easy Installation
Added Gains of up to 115 Horsepower
Adds 290 Foot Pounds of Torque
Displays & Clears Trouble Codes*
Excellent Throttle Response & Helps Eliminate Downshifting While Towing
Increases Fuel Economy
Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times a host of other parameters*
*With the Attitude Optional In Cab Controller

Ford 7.3L Power Stroke Diesel 1994-2003

5 In-Cab Adjustable Power Levels*
Quick & Easy Installation
Added Gains of up to 75 Horsepower
Adds 200 Foot Pounds of Torque
Excellent Throttle Response & Helps Eliminate Downshifting While Towing
Increases Fuel Economy
Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times a host of other parameters*
*With the Attitude Optional In Cab Controller

Dodge Ram 5.9L Cummins Diesel 600 Series 2004.5-2005

5 In-Cab Adjustable Power Levels*

Quick Easy Installation

Added Gains of up to 25-100 Horsepower

Adds up to 250 Foot Pounds of Torque

Excellent Throttle Response & Helps Eliminate Downshifting While Towing

Increases Fuel Economy

Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times a host of other parameters*

*With the Attitude Optional In Cab Controller

Dodge Ram 5.9L Cummins Diesel 2003-2004

5 In-Cab Adjustable Power Levels*

Quick & Easy Installation

Added Gains of up to 25-100 Horsepower

Adds up to 250 Foot Pounds of Torque

Excellent Throttle Response & Helps Eliminate Downshifting While Towing

Increases Fuel Economy

Replaces gauges by displaying EGT, Boost, RPM, 0-60, ¼ mile times, Transmission slip protection, boost control, cold engine protection a host of other parameters*

*With the Attitude Optional In Cab Controller

Chevy/GM Duramax Diesel 6.6L 2004.5-2005 LLY

The Edge Juice is a completely weatherproof module that easily installs underneath the hood. With the addition of the Attitude monitor you can add five levels of adjustable power ranging - from 30 to 120 horsepower* - and increase torque up to 275 foot-pounds*. The Juice greatly improves responsiveness and drivability, while at the same time increasing fuel economy. The Juice communicates along the engine's CAN-BUS data stream, from which it receives vital engine, transmission, and fuel system information. This enables the Juice to provide smooth and precise power curves that are truly custom, rather than just an offset from stock. The Juice also monitors the transmission slippage when the torque converter clutch is engaged. The power level is decreased if any slippage is detected. This prevents damage from being caused to the transmission, and also prevents the power train from erroneously generating fault codes and entering "limp mode". The Juice also limits the amount of power increase during transmission shifts when the torque converter clutch is engaged and also when the torque converter clutch is being engaged. This allows the torque converter clutch to engage without slippage causing "limp mode".

When the torque converter clutch is engaged, fifth gear on the Allison 1000 transmission will hold about 680 foot pounds of torque before slipping. Gears 2-4 with the torque converter clutch engaged have never slipped in Edge's testing. (We have tested over 900 foot-pounds of torque with no slippage). Without the sophisticated transmission monitoring that the Juice performs, the total power increase would need to be limited to the weakest conditions to prevent "limp mode".

Chevy/GM Duramax Diesel 6.6L 2001 2004 LB7

The Edge Juice is a completely weatherproof module that easily installs underneath the hood. With the addition of the Attitude monitor you can add five levels of adjustable power ranging - from 60 to 150 horsepower* - and increase torque up to 350 foot-pounds*. The Juice greatly improves responsiveness and drivability, while at the same time increasing fuel economy. The Juice communicates along the engine's CAN-BUS data stream, from which it receives vital engine, transmission, and fuel system information. This enables the Juice to provide smooth and precise power curves that are truly custom, rather than just an offset from stock. The Juice also monitors the transmission slippage when the torque converter clutch is engaged. The power level is decreased if any slippage is detected. This prevents damage from being caused to the transmission, and also prevents the power train from erroneously generating fault codes and entering "limp mode". The Juice also limits the amount of power increase during transmission shifts when the torque converter clutch is engaged and also when the torque converter clutch is being engaged. This allows the torque converter clutch to engage without slippage causing "limp mode". When the torque converter clutch is engaged, fifth gear on the Allison 1000 transmission will hold about 680 foot pounds of torque before slipping. Gears 2-4 with the torque converter clutch engaged have never slipped in Edge's testing. (We have tested over 900 foot-pounds of torque with no slippage). Without the sophisticated transmission monitoring that the Juice performs, the total power increase would need to be limited to the weakest conditions to prevent "limp mode".

Unlike other products on the market, The Juice allows for moving power to be put to the ground under all conditions without transmission slippage or "limp mode". When the torque converter clutch is engaged in fourth gear and under a heavy load, the Hot Juice should provide about 30-32 psi of boost, if the waste gate has been disabled on the turbo. Fifth gear will provide about 25-26 psi of boost when the torque converter clutch is engaged.

Ford 6.0L Power Stroke Diesel 2003-2006 (Juice Platinum)

FEATURES FULL TRANSMISSION CONTROL

- Defuel During Shifts • Defuel During Transmission Slip • Defuel During TCC Lock-Up
- Adjust shift firmness and TC Lockup points
- **INCLUDES TURBO TIMER!** Turbo timer feature prolongs turbo life by allowing the truck to continue running after shut-off until a predetermined EGT or Time is reached.
- **DISPLAYS AND CLEARS TROUBLE CODES** • Including complete text descriptions of the error code
- **SHOWS TRUE SPEED** • By taking into account changes in tire size and axle ratio
- **ADVANCE SAFETY FEATURES INCLUDE:**
 - Automatic defueling to prevent excessive EGT, turbo boost and transmission slip
 - Cold engine protection
 - User selectable audible alerts for EGT, speed, boost, engine and transmission temperature
- **REPLACES GAUGES**

The Attitude displays all the information a set of gauges would including RPM, Boost, EGT plus:

- Transmission Gear • Transmission Fluid Temperature • Transmission Slip Percentage
- 0-60 and Quarter Mile Times • Backdown Percentage • Intake Air Temperature
- Engine Oil Temperature • Torque Converter Slip Percentage (when torque converter is locked)
- Engine Coolant Temperature • Load Percentage • Throttle Percentage
- Correct Speed MPH • Torque Converter Locked • Engine time On
- **REMOVES SPEED LIMITER** • For race applications only
- **DRAMATICALLY IMPROVES DRIVEABILITY, TOWING PERFORMANCE AND MILEAGE**
- **5 ON-THE-FLY ADJUSTABLE POWER LEVELS**
- **EASY 30-MINUTE INSTALLATION**
- **UP TO AN ADDITIONAL 115 HORSEPOWER***
- **INCREASE TORQUE UP TO 240 FT. LBS**

*Power levels add 25, 40, 60, 80 and 100 horsepower. 115 horsepower gains available with Hot Juice upgrade and is for race applications only

Ford 6.0L Power Stroke Diesel 2003-2006 (Juice)

The Power Edge Juice is a completely weatherproof module that easily installs underneath the hood using factory-style connections and in just five minutes. With the addition of the Attitude monitor you can add five levels of adjustable power ranging - from 40 to 115 horsepower* - and increase torque up to 290 foot-pounds*. The Juice module greatly improves responsiveness and drivability, while at the same time increasing fuel economy. The sophisticated tuning adjustments made by the Juice also results in fuel mileage gains of up to 10% over stock. The Juice communicates directly with the engine's ECM, from which it receives vital engine, transmission, and fuel system information. This enables the Juice to provide smooth and precise power curves that are truly custom, rather than just an offset from stock.

**Legal in California only for racing vehicles which may never be used upon a highway.

Ford 7.3L Power Stroke Diesel 1994-2003

The Edge Juice/Attitude is a highly sophisticated package capable of dramatically improving your Ford 7.3 liter's drivability, towing, mileage and, most importantly, POWER.

The Juice module is a completely weatherproof module that installs underneath the hood. Using factory-style connections in just 20 minutes you can add five levels* of adjustable power ranging from 25 to 75 horsepower* and increase torque up to 200 ft. lbs.* The Juice greatly improves responsiveness and drivability, while at the same time increasing fuel economy.

When used in conjunction with the Attitude monitor you can control the five power levels on the fly from inside your truck. The Attitude displays all the information a set of gauges would and will automatically monitor exhaust gas temperature (EGT) and de-fuel the engine to prevent excessive EGT.

Imagine, one simple 20 minute installation and you get incredible power gains, an increase in mileage and the equivalent of a complete set of gauges*!

- Dramatically improves drivability, towing performance and mileage The Juice communicates directly with engine's ECM, from which it receives vital engine and fuel system information. This enables the Juice to provide smooth and precise power in real time under any driving conditions.
- Additional 25 to 75 horsepower gains
- Increase torque up to 200 ft. lbs.
- Increases fuel economy
- Replaces gauges - The Attitude displays all the information a set of gauges would including RPM, Boost, EGT, Backdown Percentage and more. The Attitude will automatically monitor exhaust gas temperature (EGT) and de-fuel the engine to prevent excessive EGT plus the monitor is capable of flashing warnings at user set levels of EGT and Boost.

- Touch-of-a-button control - When used in conjunction with the Attitude monitor you can control the five power levels on the fly from inside your truck.
 - 5 adjustable power levels
 - Easy 20-minute installation
 - Tuned for optimal performance when stacked with Evolution Programmer
- * 25 to 75 horsepower gains, 200 ft. lbs. of torque, five power levels and touch-of-a-button control available with Attitude monitor attachment installed. When the Juice module is used without an Attitude monitor the Juice has only three power levels ranging from 25 to 55 horsepower increases and will NOT control EGT.
- **Legal in California only for racing vehicles which may never be used upon a highway.

Dodge Ram 5.9L Cummins Diesel 600 Series 2004.5-2005

The Edge Juice/Attitude is a highly sophisticated package capable of dramatically improving your Cummins' drivability, towing, mileage and, most importantly, POWER.

Using factory-style connections in just ten minutes you can add five levels* of adjustable power ranging from 40 to 100 horsepower – and increase torque up to 250 ft. lbs. The Juice greatly improves responsiveness and drivability, while at the same time increasing fuel economy.

When used in conjunction with the Attitude monitor you can control the five power levels on-the-fly from inside your truck. The Attitude displays all the information a complete set of gauges would and will automatically monitor and display exhaust gas temperature (EGT), turbo boost and transmission slip and de-fuel the engine to prevent excessive EGT, boost levels or transmission slippage. It also displays 0 – 60 times, quarter mile times and actual speed if you are using non-stock tires as well as a host of other parameters.

The following power gains are representative of a 5.9 Dodge Cummins (600 Series) equipped with the Juice module with Attitude monitor:

Level 0: Stock

Level 1: 25 Horsepower - 80 Foot Pounds of Torque

Level 2: 40 Horsepower - 120 Foot Pounds of Torque

Level 3: 60 Horsepower - 150 Foot Pounds of Torque

Level 4: 80 Horsepower - 200 Foot Pounds of Torque

Level 5: 100 Horsepower - 250 Foot Pounds of Torque

Imagine, within minutes you get incredible power gains, an increase in mileage and the equivalent of a complete set of gauges with one simple installation!

The Juice communicates directly with the engine's ECM, from which it receives vital engine and fuel system information. This enables the Juice to provide smooth and precise power in real time under any driving condition.
