## Premium Low Profile, Soft Roll-Up Tonneau Cover

All the features of the TruXedo® Lo Pro QT, screen-printed with the famous Harley-Davidson® logo.

### QUICK AND EASY INSTALLATION

No drill - 10 minute install with quick attach header guide.

When attaching the pre-assembled header guide, just pull the lever back and attach to the side rails.

Solid rear header and bows roll-up with the cover and self-store behind the cab with 2 security straps.

Engineered for a sleek, clean look—Less than 1" above the truck bed!

### AUTOMATIC TENSION CONTROL

The patented automatic tension control keeps constant tension on the header at the front of the bed. Keeps the cover tight.

Velcro® brand "floating hook" design uses technology that allows the hook on the rail to move, or float, back and forth. Provides for less wear and tear.

The "floating hook" and tension control work together to automatically keep the cover tight in fluctuating temperatures—even when the cover is closed!

### ACCOMMODATES ACCESSORIES

The inside mount design makes it easy to use with other accessories such as bed rails, bed liners and rail caps.

### Lifetime warranty to the original owner.

Limitations may apply to the screen-printing on the cover. Call 1-877-878-9336 for complete details.

Automatically secures when latched at the rear. Provides added security when used with locking tailgate.
